## **VividPrint** your new business advantage

**Inspire your promotional items with a new quality!**

**VividPrint is a new printing feature that results in improvements in:**

**Printing** a sharper and more intensive reflection on graphic images with a much better focus on details, that were invisible due to technical limitations used in classic raster printing.

**Reproduction** full colour management during pre-press and press processes.

**Quality** innovative solutions used during the production process connected with the repositionable paper preparation before printing allows to eliminate the problem of print lifting within the glue strip area.

**Production time** much faster orders fulfillment thanks to the innovative solutions during the printing process. All the following production processes for orders can be started right away after completing the printing on sticky notes.

**Prices** the possibility of combining several works reduces printing costs, consequently it gives us even lower costs for CMYK works than in the case of 2C graphics your new business advantage a new, improved printing processes on sticky notes, that ensures even more efficient graphics' reflection with additional benefits to our customers.
